Software Tester (QA) Assessment

Full Name: Nigam Mishra

Email ID: nigammishra2149@gmail.com

Contact Number: 7307067585

1. Test Case Design

1.1 Registration

Test Case ID	Scenario	Test Steps / Test Data	Expected Result	Type
TC-01	Register with valid details	Enter valid name, email and password and click Register	Account should be created successfully	Positive
TC-02	Register with all fields empty	Leave all fields blank and click Register	Error should be shown for required fields	Negative
TC-03	Register with invalid email	Enter an invalid email format such as `abc@`	Invalid email error should be shown.	Negative
TC-04	Register with existing email	Enter an email that is already registered	Registration should fail and an error should be shown.	Negative
TC-05	Register with short password	Enter a password below the minimum allowed length and click Register	A validation message should be shown for the password length	Edge
TC-06	Password confirmation mismatch	Enter different values in Password and Confirm Password	Password mismatch error should be shown	Negative
TC-07	Registration with maximum length input	Enter very long values in name/email/password fields	The system should accept the input or show a validation error	Edge

TC-08	Registration with spaces/special characters	Enter leading/trailing spaces and special characters in the name and email fields	The system should validate the input properly	Edge
-------	---	---	---	------

1.2 Login

Test Case ID	Scenario	Test Steps / Test Data	Expected Result	Type
TC-09	Login with valid credentials	Enter registered email and correct password	Login should be successful	Positive
TC-10	Login with wrong password	Enter valid email and incorrect password	Login should fail and an error should be shown	Negative
TC-11	Login with unregistered email	Enter an email that does not exist	Login should fail with an appropriate error.	Negative
TC-12	Login with empty fields	Click Login without entering email or password	Error should be shown for empty fields	Negative
TC-13	Invalid email format	Enter an invalid email format	Invalid email error should be shown.	Negative
TC-14	Password field handling	Enter password and verify that it is masked	Password should not be visible in plain text	Positive
TC-15	Multiple failed login attempts	Try incorrect credentials multiple times	The user should not be allowed to continue after repeated failed attempts	Negative
TC-16	Access protected page without login	Directly try to access the task page without authentication	The user should be redirected to the Login page or access should be denied	Negative

1.3 Task CRUD Operations

Create Task

Test Case ID	Scenario	Test Steps / Test Data	Expected Result	Type
TC-17	Create task with valid data	Enter valid task details and click Create/Save	New task should be created and displayed in the task list	Positive
TC-18	Create task with empty data	Leave required task field empty and submit	Validation message should be displayed	Negative
TC-19	Create task with special characters	Enter special characters in the task title	The system should either accept the input or show a validation message	Edge
TC-20	Create task with very long title	Enter a task title exceeding normal length	A validation message should be shown if the title exceeds the allowed limit	Edge

View Task

Test Case ID	Scenario	Test Steps / Test Data	Expected Result	Type
TC-21	View created task	Create a task and open the task list	Newly created task should appear correctly	Positive
TC-22	View multiple tasks	Create multiple tasks	All tasks should be displayed correctly	Positive
TC-23	View empty task list	Login with no tasks created	A message should be displayed when there are no tasks	Edge
TC-24	Refresh task list	Refresh the page after creating tasks	Previously saved tasks should still be displayed	Positive

Edit Task

Test Case ID	Scenario	Test Steps / Test Data	Expected Result	Type
--------------	----------	------------------------	-----------------	------

TC-25	Edit existing task	Change details of an existing task and save	Updated task should be displayed.	Positive
TC-26	Edit task with empty value	Remove required task data and save	The task should not be updated and a validation message should be shown	Negative
TC-27	Cancel task editing	Start editing and cancel without saving	Original task details should remain unchanged	Positive
TC-28	Edit task and refresh	Update a task and refresh the page	Updated data should remain saved	Positive

Delete Task

Test Case ID	Scenario	Test Steps / Test Data	Expected Result	Type
TC-29	Delete existing task	Click Delete on an existing task	Task should be removed successfully	Positive
TC-30	Cancel deletion	Click Delete and cancel the confirmation	Task should remain available	Positive
TC-31	Verify deleted task after refresh	Delete a task and refresh the page	Deleted task should not appear after refresh	Positive
TC-32	Delete non-existing task	Attempt to delete an already deleted/non-existing task	An error message should be shown without crashing the application	Negative

1.4 Input Validation and Error Handling

Test Case ID	Scenario	Test Steps / Test Data	Expected Result	Type
TC-33	Empty input validation	Submit forms with required fields empty	Clear validation messages should be displayed	Negative
TC-34	Invalid input format	Enter invalid email or unsupported data	The system should reject the invalid input and show	Negative

			a validation message	
TC-35	Minimum input boundary	Enter minimum allowed number of characters	Input should be accepted if it meets requirements	Edge
TC-36	Maximum input boundary	Enter maximum allowed number of characters	Application should handle the input correctly	Edge
TC-37	Database/server failure	Try saving the task when the server or database is unavailable	A user-friendly error message should be shown	Negative
TC-38	Network interruption	Interrupt connection while submitting data	An error should be shown and the task data should remain unchanged	Negative
TC-39	Special characters	Enter special characters or a simple script in the input field	The application should safely handle the input	Negative
TC-40	Invalid URL/direct request	Try accessing an invalid page or resource	An appropriate error page or message should be displayed	Negative

2. Bug Identification

Bug ID	Bug Description	Severity	Reason / Impact
BUG-01	Incorrect password allows user login	Critical	An unauthorized user could gain access to another user's account
BUG-02	One user can view or modify another user's tasks	Critical	Causes privacy and data security issues
BUG-03	Password is stored or displayed in plain text	Critical	User credentials could be exposed if the data is compromised
BUG-04	Deleted task reappears after page refresh	Major	Delete operation may not be properly saved in the database
BUG-05	Edited task returns to old value after refresh	Major	The user's changes may be lost after refreshing the pag

BUG-06	Multiple accounts can be created using the same email	Major	This can result in duplicate accounts and inconsistent user data
BUG-07	Application crashes when empty or invalid data is submitted	Major	This can affect application stability and the user experience
BUG-08	Very long task input breaks the UI or causes an error	Major	It may cause UI issues or affect normal application behavior
BUG-09	User can access task pages after logout using browser navigation	Major	Private task information may still be accessible after logout
BUG-10	Error messages expose database or server details	Major	It may expose sensitive technical details to unauthorized users
